

Job Title: Senior Firefighting Technician
Department: Operation & Maintenance

A Senior Firefighting Technician is a skilled professional responsible for overseeing and maintaining firefighting equipment, systems, and facilities. They play a crucial role in ensuring the safety and efficiency of firefighting operations.

Key Responsibilities:

- **Equipment Maintenance:** Inspect, repair, and maintain a variety of firefighting equipment, including hoses, ladders, pumps, and breathing apparatus.
- **System Testing:** Conduct regular tests and inspections of fire alarm systems, sprinkler systems, and other fire protection equipment.
- **Training and Education:** Provide training and education to firefighters on the proper use and maintenance of firefighting equipment.
- **Emergency Response:** Assist in emergency response efforts, providing support and expertise as needed.
- **Safety Compliance:** Ensure compliance with fire safety regulations and standards.
- **Record Keeping:** Maintain accurate records of equipment inspections, repairs, and maintenance.
